

MICROKIT STAR PRODUCTS BY SECTORS

4.

COSMETIC INDUSTRY

(See also Pharmaceutical chapter):

* COSMETIKIT of ready-to-use long time life media KMT444, 20 complete test, for who wants to make the bests microbiological analysis

* LPT Neutralizing Broth, our preservatives inactivador broth, the best in validations, DMT217, 500g, IDEM 9ml tubes, TPL053S, 20 or 200 u,

IDEM 90 ml Bottles for treatment and enrichment of 10 g samples, RPL054, 10 or 90 u

* TSA-LPT Neutralizing Agar, for best recuperation of all kind of total plate flora, DMT066, 500g, Tubes 20 ml TPL200, 20 or 200 u, Bottles 100ml RPL074, 10 or 90 u

* Mannitol Salt Agar, for *Staphylococcus aureus* detection avoiding false negative Baird Parker results, DMT078, 500g, Tubes 20 ml TPL066, 20 or 200u, Bottles 100ml RPL023, 10 or 90 u

* Cetrimide Agar, for detection of *Pseudomonas aeruginosa*, DMT034, 500g, Tubes 20 ml TPL100, 20 or 200u, Bottles 100ml RPL010, 10 or 90 u

* *Burkholderia cepacia* BCPT Agar (BASE) DMT004, 500g & SUPPL.SMT301, enough for 7 liters

* MugPlus, for *E.coli* detection (blue colonies) and rest of coliforms (pink colonies), DMT400-, 100g, Tubes 20 ml TPL400, 20 or 200u, Bottles 100ml RPL400, 10 or 90 u

* Biggy Agar, for *Candida albicans* detection, DMT017, 500g, Slant Tubes TPL062, 20 or 200u, Bottles 100ml RPL009, 10 or 90 u

Also all the media of cosmetic ISOs: Eugon LT Agar, Eugon LT Broth, Neutralizing Diluent, SCDLP 20

* COSMETIKIT-WATER for a complete analysis of the most problematic raw mather in cosmetic field KMT450 for 10 analysis

* SEILAPARFUM, Intercomparative Service of cosmetical microbiology, SMT005, all parameters together, each 4 months (please consult each country, some national laws prevent import of microorganisms).
